

Food Contact Certificate

Ultrasint® PA 11

According to information provided by our suppliers, we hereby declare that Ultrasint® PA 11 complies with the general legal requirements of Regulation (EU) No. 1935/2004 for food contact materials applicable at our stage of the supply chain and is manufactured in accordance with the requirements of Commission Regulation (EC) 2023/2006 of December 22, 2006 on good manufacturing practice for materials and articles intended to come into contact with food.

The composition of the product complies with Regulation (EU) No. 10/2011 and amendments. One or more substance(s) subject to restrictions are considered as proprietary information. These substances will be disclosed upon request after signature of a confidentiality agreement.

In addition, this product does not contain any colorant or pigment and no substance approved by Regulation (EC) No. 1333/2008 and amendments on food additives and/or by Regulation (EC) No 1334/2008 and amendments on flavourings.

The product is manufactured according to the Good Manufacturing Practices, as defined by the specific requirements of Article 3 of Framework Regulation (EC) No 1935/2004. Particular measures have been implemented to confirm the compliance of the raw materials and to assure a good level of traceability of this product, in accordance with the requirements of Articles 16 and 17 of Framework Regulation (EC) No 1935/2004.

Studies have been carried out on the NIAS contained on a similar grade of the above-mentioned product. However, we would like to draw your attention that formation and identity of NIAS are closely linked to conditions of manufacturing process, number of manufacturing steps, applied test conditions, identity of the substances in the mixture.

It is the responsibility of the converter of food packaging that places the finished product on the market to ensure its compliance with Regulation (EC) No 1935/2004, especially Article 3 or with Regulation (EU) No 10/2011 as amended.

This statement is based on information provided by raw material suppliers and is not verified by analytical testing of the finished product.
